Declaration of the publication ethics and malpractice statement

The scientific and theoretical journal of the Russian Academy of Sciences “Optika atmosfery i okeana” was founded by the Siberian Branch of the Russian Academy of Sciences (SB RAS) and V.E. Zuev Institute of Atmospheric Optics SB RAS (IAO SB RAS).

The journal is published since 1988. Academician V.E. Zuev was an establisher of the journal and its first editor-in-chief. The original name of the journal “Optika atmosfery” was changed in 1993 in connection with the expansion of topics. Co-founders and editorial board of the journal support the principles that are held by the leading scientific publisher Elsevier:
http://www.elsevier.com/about/publishing-guidelines/publishing-ethics
Springer:

International Academic Publishing Company “Nauka / Interperiodica”:

We strive to guarantee the quality of journal papers and follow the principle that the publisher has the primary responsibility for maintaining the integrity of scientific publications, we help to authors and reviewers to maintain standards of ethics adopted by the majority of scientific information providers and publishers. Compliance with these standards is necessary to ensure the quality of scientific publications, public confidence in the results of scientific activity, and adequate recognition to the authors.

We demand the exclusion of falsification, plagiarism and self-plagiarism, inability for authors to submit the papers of the same content in more than one journal, avoiding repeated copying similar information in different papers of false attribution of authorship and mislead the public as to the true contribution of the authors of the publication.

Authors and reviewers are required to report their interests that could affect their objectivity when providing, editing, and reviewing material items (in case of conflict of interest). These may be financial, personal, political, religious interests, and the interests of the mining plan. The procedure for review must be objective.
